Acknowledgement

At the end of my thesis I would like to thank all kind people around me who made this work possible and an unforgettable experience for me. It would not have been possible to write this thesis without the help and support of them, to only some of whom it is possible to give particular mention here.

I would like to express my deepest gratitude to Professor Dr. Mona Farid Kansouh for her continuous advice, guidance, caring and encouragement throughout the course of this thesis. Her mentorship was paramount in providing a well rounded experience consistent my long-term career goals.

I would also like to thank Professor Dr. Ali Mostafa Abd El-Moniem and Dr. Ossama Elsayed Bekheit for guiding my research and helping me to develop my background in pediatric oncology.

I want to express the profound gratitude from my deep heart to my beloved parents, my brothers and sister and all of my family for their love, patience and continuous support for which my mere expression of thanks likewise does not suffice. It was under their watchful eye that I gained so much drive and ability to tackle challenges head on.
