First, the problem of the study:

The interest of the role of non-Governmental Organizations is more important recently because of their impact in helping citizens socially, economically and eases the burden on the government in the face of growing problems. These organizations are based mainly on voluntary charity, which is characterized by wide-ranging.

However, the family now draws a lot of social variables and economic crises arising from the high rate of poverty and low standard of living and widespread unemployment among young people and the lack of job opportunities and the inability of young people from the management requirements of the marriage dowry and expense, furniture and others has led to high rates of spinsterhood among male or female and bringing to think of marriage and building a family is difficult and not within the reach of most young men and women.

And it is not only limited to poverty and youth unemployment, but also may have affected previous problems and on the family, especially the families of the poor, orphans who need assistance, as well as a poverty may lead to the parents terminate the engagement of their daughters after several years, because of not being able to money of marriage, the other party may cancel it to the length of time agreed upon. This prompted the representatives of organizations of interest in this category and sponsorship in accordance with the text of the General Regulations for each organization, which is based
Study abstract in English

on the provision of humanitarian assistance to this category. Examples include "ELGameah ELSharea - Altoasl- Resalh-Alawrman- Makarem Alakhalaq- Salah El-Din ...... etc."

Because the profession of social work is as a humane profession, as well as a system that works on solving the problems of individuals or groups and develop their abilities and preferences and their access to the level of life in accordance with their own desires and achieve social adjustment.

Because of the goals of social service non-direct is to strengthen the values of social solidarity, they seek to provide help and assistance to all categories of society and its entities. Among the most important of those entities of family whereas social work profession is interested in their areas, methods and strategies and roles of professional achievement of social adjustment for the family and the individual.

The study of social work for a category of poor girls to get married is necessary and inevitable that is due to subject to this category of psychological, economic and social pressure and the field of family and childhood is as one of the areas of social service that has the ability to recognize the contribution of NGOs in ensuring that poor girls to get married.
Study abstract in English
