### Abstract:

This papers aims to publish the hieratic papyri P. BM EA 10777 stored in the British Museum, in addition to study the role and the function of the expression *anxt nw niwt*. This fragment represents list of titles and names associated with the palace. This papyrus was uncovered by W. Petrie at Kom Medinet Ghurab. A. Gardiner donated it to the British museum in 1958. According to the names and titles as well as the palaeography, this papyrus is probably from the 19<sup>th</sup> Dynasty.
