

**The Personal Epistemology**  
**Study in the Micheal Polanyi's philosophy of Science**  
**Khaled A. Qutb**

Micheal Polanyi(1891-1976) is one of the important philosophers of science in the Twentieth century. He offered a new philosophy of science. His philosophy bridged the gap between fact and value. He, also rejected the traditional concept of objectivity in science. He claimed that the scientific knowledge is personal. It is tacit knowledge.
