Aim of the research:

The research aims to clarify the impact of frequent use in the creation of sound grammatical changes, the frequent use of lead to be what the people want harder than wishing him; this may lead to a decrease in abundance audio frequency time. A multiplicity of use not only the frequency of the word or phrase on the tongues, a multiplicity of frequency method, or a particular system of language systems makes it subject to the disposal of the people of the language, although it was associated with a tendency to say to the ease and facilitation principle means frequent use.

As well as the impact of Aodkh Find frequent use in removing the confusion, Phusilh rid of convergence-dwelling, for example, but it is a stirring, stirring this movement vary between conquest and annexation and breakage, and this stirring and OK linked to the security of confusion.

As research shows the impact of frequent use in achieving harmony and voice, as may indicate a lack of use of the asset, so the frequent use of a function of the image that are not to develop, and may be reversed from the original to the branch to achieve voice harmony by getting rid of the sections is unwanted and get lighter and easier clips, and sometimes be identical vowels that occurs weight Mstla, Arabic resort to be diluted by acoustic violation and up to the voice harmony in the floor structure.

The researcher tried and points of view closer to the old Btfseerathm analyzes and convincing, and the evolution of each lesson to talk to the statement of the impact of frequent use in audio grammatical changes.
