

10- " The sonic match in the structure and the assembly "raved the sonic searching " the match in the structure single and vehicle “, and the favored symmetry sonic at that, and intends by proportion sonic presence of approach or agreement in characteristic or some consecutive characteristics between sounds in series sonic extended on level adjacency of the forms when ttrkb in linguistic context spoken, and leads is the approach raved or the union in the director without the characteristics, or in them together, and leads the roadsigns are in a statement one, any one Srfyt one effective or nominal, and leads neighboring structures are in. Intentional in the similarity sonic effect of the sounds neighboring some her in some, progressive effects (next) in such a manner that the roadsign perceives second (next) in the sound first (previous), or retroactive effects (arranged) in such a manner that the roadsign perceives first (previous) in the sound second (next), the effect raved approach of the roadsigns in the characteristic performs to or the director, and the similarity raved in other than complete; Where one of the roadsigns in some his guards characteristics . Or union of the roadsigns in all their performs to characteristics and their director, then melts first their in second, and the complete match raved in; So does not guard

His the changer sound in any thing from characteristics or his director, yet colleges with the sound be alike last and melts in him in such a manner that roadsign becomes one tightening all at once pronounces, and the tongue rises about him aartfaae't one; Then the sound stenographs device of the pronunciation the exerted effort in the moving from director the first to director sound second, so members of the pronunciation be in agreement with together and happens between her the agreement varied from the stubborn practical pronunciation, and that

three positions realize from important what observes him the Arabic language, weak :

Firstly : The sonic agreement, where the sounds approach or her characteristics unite in or her directors .

Secondly : Facilitation the practical pronunciation and her lightening, and especially if the neighboring sounds from different natures were as that their one is mhmwsaaAA and last mjhwraaAA, or sharp their absolute and last open, and this way .

Thirdly : The muscular economy in the effort the exerted in operation the different pronunciation for the sounds in investigation her characteristics and the moving from director to last director .

The structure means in the one the one aalSrfyt the one in what befalls her from precedents or dwaaxl or appendages of formation one one, triple identicals of the verb who they increased on his root their letters hamza arriving wtaa' the fabricating; To the effective structure converts blessing triple mere (verb) to the quintet extra (aaftae'ala) , and the conversion in the builder raved the precedent is complete by means of hamza arriving with aalSaay't the short represented in roadsign the fragment, waaldaaxlt weak taa' the fabricating which already the adjacent sounds interact with precedent have fun on her or subsequent have fun .

The facilitating was for statement of the illness sonic for the symmetry sonic, the descriptive sounds and her directors, and the homogeneity and the approach, and the complete similarity allowable from him and the duty, and the similarity other than complete .

The door first : Match of roadsign for other in structure one : In him five chapters :

The chapter first : The last verb . The chapter second : The verb aalmDaare' .

The chapter third: The matter did. The chapter fourth : Regime of the segments sonic for the forms effective .

The chapter fifth: The nominal forms .

The door second : Neighboring match of road sign for other in structures: In him chapters :

The chapter first : The sonic match in connected structures: Spoke in him about the sonic match complete, and the sonic similarity other than complete, and impact that in the sonic segments for the forms .

The chapter second : The sonic match bnytyyn detached : Spoke in him about match of sounds aalnwnwaalbaa' and aalthaa' and indicative waaldhaalwaalraa' waalfaa' waallaam for the adjacent sounds have fun from first the structure adjacent in series neighboring sonic, then spoke about favored this match in the sonic segments .

(and what successes to in Allah on him be authorized and to him delegated)

11- Address of the searching: " **The dropping in the structure influenced aalSrfyt in hair of son close aale'ywny "the searching raved treats " the favored dropping in the structure aalSrfyt in hair of son close aale'ywny " and the dropping is one of of elements hairy important, corroded indeed the old hair introduced that he " weighed statement mqfY indicative on meaning** ". The linguistic builder for him relative to dropping him, dropping of the weight differs about who idealizes him his the designating sea in activations, tones of the sounds imitate in, and the builders waaltraakyb and her music the originating from repetition her on towards what in verses of the poem, indeed " the linguistic dropping straightens on the roadsign beginning in the movement then the single sound, so the word, so the sentence, and to raved so indeed the roadsign becomes key of the impacts last in the hair, and evident personality about road of the success gains his and in yen what precedes him, and the textile becomes the dropping he who the expectations and the satiations are formed from, or the surprise which delivers her context of the segments, and for your lowness so indeed language hairy last level in neighborhood of language aalnthr, and important what language distinguishes aalnthr – in beliefs – conservative on the builder the linguistic bases and the criteria reconciled for which her status the sculptor .

Important what language distinguishes the hairy preservation on the art and the dropping and the music and the horseman and the emotion, and indeed came that on account of the bases and the criteria

Indeed the weight and the rhyme prefers in syntax construction and her assembly presentation and delay, and memory and teal, and dismissed and blessing prevented pure, and movement for inhabitant or coins us for moving, as for the proficient names and the verbs the ruler so all one

from them for him his relative to weights him, and his builders and his organizations in her movements which her meaning be specified, and was complete you from her weight that humbleness in mold from decided molds the builders in the language, and helped which reports her the structure or the form strengthens them the phonetic evidence, then her industrial hills, then her moral hills; So identicals of the verb (rose) walrus on his indicates for his source, and indicates bnaau'h on his time, and his meaning indicates on so rises him, and as your lowness the beating and the killing : The pronunciation vented the occurrence reports in them, and breath of the form reports in them SlaaHhmaa for the times the three, and as your lowness participle towards: Upright and seated – for walrus his the occurrence reports who he the rising and the sitting, and his form wbnau'h reports forms him the verb accompanied, and as your (lowness cut up and as secret) so her breath of the pronunciation – here – meaning of the occurrence reports, and portrayed him things report : Their last one, and last tkthyr the verb, just as that (striking) his pronunciation reports in the occurrence, and in constructive his last and universe of the verb from two, and in his meaning provided that for him subject " .

So the effective form reports originally three different meanings with regard to she :

1- Evidence of the pronunciation on the source – any occurrence. 2- Evidence beautiful or the structure or the form or the pure image on the time, and this evidence hills of the evidence phonetic in the forces, since she indeed her organization or image carries her the pronunciation, so she is evidence of hills the felt evidence therefore was the moral evidence strengthens from . 3- The moral evidence on the subject .

Already organization of the form reports dlaalaat additional other than the pure evidence on the time, from examples of that evidence weakening of the eye on aalkthyr, and evidence the constructive reactant on universe the verb from two, to other than of which reports him the excrescences formed

As for the nominal form so indeed her reports dlaalaat last already the effective forms participate with in some her like evidence exported and evidence name of the subject on the occurrence, and chronically ill grammatical . Already the nominal form isolate oneself in some aaldlaalaat beautiful identicals of evidence participle on that he the verb – accompanied any occurrence, so he indicates on subject of the verb. The searching expands to that structures include and changed her of which comes out him aalSrfywn from studious aalSrfyt because the poet already behaves in her so her structure changes and prepared her in facilitation spurred her or deleting of letter from her or calming letter of moving, and other than of which his observation the searching . The method took from the ways who promises from the important methods Haditha for study the language is method for study brown aalSrfyt in close hair of beauty the debt on coffee aale'ywny the newborn is general 572h and deceased general 630h and observation leads

The searching in felt him the phenomena aale'dwlyt connected in brown and which the consecutive hair Arabic during his eras spread in, and textual interpretations uniform in his places from the text explain the searching that phenomena, and leads came that through study the favored weight in the deviating in the structure aalSrfyt, and the favored rhyme in the deviating in the structure aalSrfyt, adequate colleges of the subjects studied the deviating in the increase, and the deviating in the deficiency, and the deviating in the change .

raajyaaAA from Allah the assisting and the obstruction. (What successes to in Allah on him be authorized and to him address of the searching delegated)11- : " The sonic deleting in the agreement between elements influenced the assembly studios in the Quran generous " took in the favored searching " the deleting in the sonic agreement between elements of the assembly raved studios in the Quran generous " since the sonic agreement among purposes of the deleting; Especially if the assembly was who happened in him the Quranic divider deleted in, therefore performed the Quranic searching on the text generous raved who (does not come him invalid among hands his followed from behind him wise reduction of blessing commendable) . Took in the searching raved definition of the deleting, and his purposes, and his proofs, then the transformational deleting in the method and that for the ties between bases the deleting in the Arab in considering his somewhat from kinds of the change or the deviating about the origin – and he the evidence – and base of the conversion in the transformational deleting in the manner .

Then evident how deleting one of of elements of the assembly to the sonic agreement between formed performs his, and increased the deleting raved in so arriving generous miracles of the Quran, and included the deleting raved teal special in the praise or the disparagement, losing teal special " of blessings and how evil " in all so the arriving Quran which arrived in her, and started in him for that he ranges between formed him mbtd'a or news, just as deleting included aalmbtd'i and the news, and the action in him whether apparent names are mother of conscience, whether the returning conscience the tie is mother, and teal the returning tie, and teal added to him, and ample that with yaa' talking, and teal described and the characteristic, and notices that the deleting in this places is significance on him from the context, so the element is deleted waaDH

his estimate be possible, so side of the clothing is secure, and the meaning waaDH just as that the deleting raved already moral purposes to phonetic side the purpose perform the sonic represented in the agreement .

Deleting arrived the verb blamed aalmDaare' the sick other without instrument cutting off of in a statement one in the Quran generous she word " eased " preservation on the agreement sonic in dividers the miracles which arrived in her . The deleting in all raved performs also to agreement of the segments sonic between so the arriving miracles which arrived in her .

Allah the guide to equality the way.
