

**(Research Abstract)**

**The activation of family - kindergarten partnership in Egypt  
in light of foreign experiences**

**The study dealt with an important topic which is concerned with the activation of the partnership/ participation of family and kindergarten institutions in Egypt in light of the foreign experiences.**

**The study aimed at achieving a number of objectives such as: identifying the roles and responsibilities of a family; specifying the importance, aims and reasons for partnership/ participation of families and kindergarten institutions; locating some of the recent foreign experiences related to the field of parental participation; recognizing the family-kindergarten institutions participation methods evident in Fayoum Governorate; in addition to finding out about the basic obstacles facing this partnership/ participation process in Fayoum.**

**The study put forward a number of suggestions; among them is the provision of a suggested vision that might help in the activation of partnership between families and the kindergarten institutions in light of the field study and some foreign experiences.**
