

**(Research Abstract)**  
**A Comparative Study of Educating Preschool Gifted  
Children in Egypt and France**

**The study aims at:**

- **Recognizing the methods of defining the gifted children, the strategies of caring for them and the role of the community participation in that field.**
- **Defining the France experience in the gifted children education field.**
- **Determining the effort exerted for educating the preschool gifted children in Egypt.**

**To achieve these aims, the researcher adopted the comparative method and came up with a suggested outline for developing the preschool gifted children education in the light of France experience.**
