

The Effectiveness of a Suggested Program in Teaching Psychological Pollution Issues for Enhancing Psychological Immunity Level among Pre-Service Teachers in Psychology Major

Abstract

The current research aims at investigating the following:

- The issues of psychological pollution suitable for pre-service teachers. (Psychology Major).
- The psychological immunity dimensions suitable for pre-service teachers. (Psychology Major).
- The effectiveness of a suggested program in teaching the issues of psychological pollution for developing and enhancing the psychological immunity level of the pre-service teachers. (Psychology Major).

The current research found out the following results:

- There are statistically significant differences between the mean scores of the students "the research sample" in the pre-post administration of the psychological immunity scale as a whole in favor of the post administration.
- There are statistically significant differences between the mean scores of the students "the research sample" in the pre-post administration of the psychological immunity scale regarding each measured dimension in favor of the post administration.
