The Effectiveness of Some Elicitation Techniques in Developing  
Secondary School Students' EFL Speaking Skills

الملخص باللغة الإنجليزية:

The Present study aimed at developing secondary school students' EFL speaking skills through the use of some elicitation techniques. Participants of the study were 30 First year Itsa secondary school students at Fayoum governorate. They acted as one group. The researcher prepared a speaking skills test a rubric and a teacher's guide. Having pre administered the speaking skill test and taught the study group using the elicitation techniques, the participants were post administered the same test. The results showed that the use of some elicitation techniques proved to be effective in developing secondary school students' speaking skill. The study concluded with some recommendations and suggestions for the students, teachers and

curriculum designers. Also, suggestions for further research were provided.

**Keywords:** elicitation techniques - EFL speaking skill - secondary school students .
