Abstract:

The present research sought to know the requirements for applying education on citizenship in the basic education in Egypt by reviewing the concept of citizenship and its dimensions, the concept of education on citizenship and the mechanisms applied in some countries and the relationship between Social quality and citizenship. This research used the descriptive method through a questionnaire applied to a sample of Education Experts. The research recommended the need to provide students with the necessary information to develop the values of citizenship and develop the

values of dialogue among students by discussing the different visions on contemporary issues, as well as providing students with the opportunity for dialogue and discussion with the school administration Periodically, and the use of environmental projects in the teaching of courses.
