

**Educational requirements for building the Egyptian character in the face
of some contemporary challenges
(From the experts point of view)**

Abstract

The aim of the research is to identify the Egyptian character concept and to monitor the characteristics of continuity and change in the structure of the Egyptian character before and after the revolution of 25 January 2011, and to identify the challenges facing the contemporary Egyptian character and pose a danger to them. The researcher followed the descriptive approach in monitoring and analyzing the contemporary challenges and searching for the educational requirements necessary for building the contemporary Egyptian character by reviewing what was written about it in the educational literature and through the opinions of experts in educational, social and psychological sciences about this Educational and procedures requirements necessary to achieve them.
