c) Time field: The study was conducted in the period between (١٢/ ١٠ /٢٠١٤) to (١٠ / ٤ / ٢٠١٤).

Third :- Results of the study:

The study showed the influence of online networks on the social withdrawal among university students and therefore as follows:

١-The impact of online networks on social interaction among university students by (٧٨.٢٢ %) and this reflects the weakness of social interaction among university students who use the internet , and that with those around them including family, relatives, friends and neighbors as a result of excessive use of the Internet.

٢-The impact of online networks on community participation among university
   students by (٧٧.٨٨ %) and this reflects the weakness of community participation
      among university students who use the internet , and that with those around them
      including family, relatives, friends and neighbors as a result of excessive use of
the   internet.
٣- The impact of online networks on social isolation among university students by
  (٧٣.٥٩ %) and this reflects the weakness of social isolation among university
   students who use the internet , and that with those around them including family,
relatives, friends and neighbors as a result of excessive use of the Internet.

٤- Reaching a proposal for the role of social work in reducing the impact of the internet on social withdrawal of university students.
