**Study Title: Requirements for Strengthening the Digital Life of University Youth and the Role of Social Service in Achieving It**

## First: Problem of the study:

The progress and advancement of nations has been measured by the extent of its production and use of modern technologies in various areas and aspects of their lives and as much as it has knowledge and information that makes it a productive state of modern technology and contribute to the progress of nations and people. Information and knowledge possessed by nations and peoples are essential basis for keeping pace with tremendous developments in various areas of life.

Digital life has a great importance represented in preparing a generation of different ages capable of dealing with electronic issues in society by providing an integrated reference to common electronic issues and demonstrating the best ways in dealing with society's values and customs. With the advent of digital technology, the world has changed dramatically. Significant changes in the professional and personal life of individuals have occurred around the world, affecting aspects of society. And Now it becomes an integral part of people's interaction, whether it is in work, education or access to knowledge and information. This new technology came to make universities better than before.

**Second: Study Concepts:**

1-The concept of requirements

2-The concept of digital life

3-The concept of digital content

4-The concept of digital communication

5-The concept of value behavior.

6-The concept of digital capabilities

**Third: Study Objectives:**

The study aims to achieve a main objective: Determine the requirements for strengthening the digital life of university youth and the role of social work in achieving them

**From the main objective, sub-goals emerge:**

1- Determine the requirements for building digital capabilities for university youth.

2-Determine the requirements of the value behavior of university youth.

3-Determine the requirements for using digital content for university youth.

4-Determine the digital communication requirements for university youth.

5-Reaching a proposed vision for the role of social work in strengthening the digital life of university youth.

**Fourth: Study questions**

This study stems from a main question: What are the requirements to support the digital life of university youth and the role of social work in achieving them?

**Sub-goals emerge from the main objective, which are:**

1- What are the requirements for building digital capabilities for university youth?

2- What are the requirements of the value behavior of university youth?

3- What are the requirements for using digital content for university youth?

4- What are the digital communication requirements for university youth?

**Fifth: The methodological procedures of the study:**

**1- Type of study**

The type of study is determined according to the goal it seeks, and the current study aims to identify the requirements for supporting digital life and the role of social service in achieving it. Therefore, this study belongs to the style of descriptive studies, as it is the most appropriate type of study appropriate to the nature of the subject of the study.

**2- Study methodology**

The study relied on the sample social survey method

for students of the four teams, regularity - affiliation, at the Faculty of Social Work, Fayoum University, and represented the size of the research community in (362 individuals)

## 3- Fields of study

### (a) The spatial field of study:

This study was applied to students of the four teams (regularity, affiliation) at the Faculty of Social Work, Fayoum University

For the following reasons:

-The college's direction is to apply scientific studies to the Fayoum community.

The college's contribution to supporting the digital life of the university community.

C- The researcher worked as a teaching assistant at the Faculty of Social Work, Fayoum University.

### (b) Human Field of Study:

Students of the four teams at the Faculty of Social Work - Fayoum University.

### (c) Time domain of the study:

This is the period of time that the researcher spent in the field from(3/29/2022 AD - 4/1/2023 AD)

## 4-Study tools:-

A- Data collection tools: a questionnaire about the requirements of supporting the digital life of students of

social work applied to students of the Faculty of Social Work - Fayoum University

B- Data analysis tools: Statistical Package Program Used in Social Sciences (SPSS20).
