

The use of model focus on member have to alleviate behavioral problems for orphans institutions of social welfare

Summary of the study

prepared by Dr: Mohamed Mohamed Hassan (Assistant Professor, in Faculty of Social Work)

The use of model focus on member have to alleviate behavioral problems for orphans institutions of social welfare

study problem:

the care of children is increased in general, as represented by the Children of the browser in the community because they tomorrow's youth and leaders of the future any society should take care of them to become good men through The interest in their care, but it wants fates that suffer from them a category of children orphaned as a result of the death of the parents or one of them ,That would require help , those orphans.

We have established social welfare institutions to take care of orphans and the poor in order to provide care and services appropriate social, psychological and educational and psychological . But proved many of the scientific studies and research that there is a clear lack of care in the way and method of socialization in these institutions With the low look at themselves orphans and a look at the society they grew up in bomb shelters, which leads them to behave in the behavior of non-together and unacceptable.

Now there are many behavioral problems spread among children, which might require the social service profession as the basic professions to care for these groups to intervene using the focus on the group member to alleviate these problems.

concepts of the study:

1- A model focusing on the group member

2- residential institutions

3- orphans

4- Behavioral problems

methodological procedures :

The study used experimental approach which fits with empirical studies using the design model of the one group the Study Tools measuring social problems

The study has been applied to social care institution at(hadka _ Fayoum governorate)

It has been established that the main assumption corrected by verifying the authenticity of the following assumptions :
