Skills in social work are considered a basic necessity in practice, as they contribute to achieving the goals it seeks, as they save time and effort for the social worker because it shows the specialist's awareness of the principles and professional foundations in appropriate situations, and that skills direct social service practitioners towards the correct paths to specifically achieve social goals. According to the methods of professional intervention to satisfy the needs of customers and face their problems.

The skills distinguish social service and clarify its human professional identity and also clarify the capabilities that characterize the social worker as he releases knowledge in different professional situations as professional skills determine the procedural aspects of the specialist's dealing with problems or situations and is an important pillar in professional intervention to achieve the goals of the process of assistance better.

Acquiring skills in professional practice contributes to raising the level and prestige of the profession in society. The more social workers have a high level of knowledge, the higher the position of the profession in the community. In general, the importance of social work in the educational field is due to the fact that it works in large sectors of society, It also receives the attention of all those responsible for preparing the new generation who will bear the responsibilities of the future. If the social service succeeds in its constructive role, it will have made a definite contribution to achieving the development goals and the development of society.

Social service in the school field is a profession that the educational institution needs to achieve its social function in a way that is tailored to the changes that society gains and affects the lives of everyone who lives within its scope.

Each of the human societies has its goals that it works to direct the efforts of its members towards achieving, and the means of each of these societies in this direction is in the emergence of these individuals to be convinced of these goals, adhere to them and know their means and methods and work to achieve and achieve them.

And social service in its contemporary sense aims to help individuals and groups to reach the maximum possible degree of social, psychological and economic well-being.

Social work uses its professional methods, specialized technical methods, and scientific practice models that differ from the curricula, methods and methods used by other professions. The life of the individual, family and society.

In our contemporary world, the social worker is considered the owner of a specialized profession (social work) that has its own technical systems and scientific methods. It is concerned with identifying the basic needs to work on satisfying them lest they turn into a problem, and from here it was necessary to develop the skills of the social worker to keep pace with the developments of the era in which we live, and it was necessary to Developing those skills from the traditional based on the traditional foundations of professional practice of social work, to adding contemporary skills related to contemporary technological progress, in order for the social worker to keep pace with the developments of the modern era.
