Social Work, Fayoum University)

The study is one of the descriptive studies that describe the role played by civil associations in facing the emerging crisis of the Corona virus. The study aimed to determine the mechanisms adopted by the associations in dealing with the Corona virus pandemic, whether in the field of monetary and in-kind support or in the field of awareness and moral support or in the field of providing services, as well as identifying the obstacles that these associations faced and impeding them from carrying out their role in dealing with the coronavirus pandemic and proposals to overcome these obstacles, to achieve this, the study used the comprehensive social survey approach for workers involved in dealing with the coronavirus pandemic in major civil associations active in this field at the level of the North Upper Egypt region, and analyzing the electronic content of social networking sites and websites Egyptian and Arab NGOs and news websites on the Internet related to the experiences of NGOs that dealt with the coronavirus pandemic .
