

Abstract (6)

Requirements for the settlement and development of future foresight studies in the Arab world: An applied study on some academics in Egypt

It is accepted to be published in the Scientific Journal of the Faculty of Arts, Assiut, Issue 85, January 2023

Prepared by : Dr. Mohamed Ibrahim Ibrahim Mabrouk

Sociology teacher - Faculty of Social Work

Fayoum University

Foreseeing the future has become an urgent necessity; Due to the rapid changes in the structure of the global community, however, There is less interest in future foresight studies in developing countries in general, and in Arab countries in particular, in addition to the fact that the knowledge building related to them in the Arab world still suffers from a knowledge gap and lacks an integrated vision for the foundations of future foresight and industry; Accordingly, the current study came from a main question: What are the requirements for the settlement and development of future foresight studies in the Arab world? To answer this question, the study relied on the sample social survey approach, the descriptive method, and individual in-depth interviews for the study sample based on an unregulated interview guide that was applied to a sample of 50 A faculty member in Egyptian universities, and The National Center for Social and Criminological Research and the National Planning Institute , and the study concluded: The intellectual production of future foresight studies in the Arab world is still very weak in terms of quantity and quality, and that there are problems facing conducting these studies in Arab countries, and that there are material, human and administrative

requirements; To localize and develop these studies, however, it is expected to increase interest in them and improve their conditions in the future.

Opening words:

requirements – localization – development – future foresight studies
