Research Summary:-

Virtual Museum "Virtual museums is a place that combines aspects of holdings from the times of the past may range from several years to thousands of years, the museum has limited to: holdings of certain personal (as a museum Umm Kulthum), and specializes in the subject of the (Egyptian Kalmthv) or a specific geographic area (a museum of Nubia).

I have used the virtual museum through several different ways other than the rest of the virtual enterprise that can not resign completely from the realism institutions it displays the contents of the realistic museums but he overcomes spatial boundaries it combines many collectibles from different parts of the world for displays them in one place, as it leads service for researchers and students alike in being connects those acquisitions studies and research addressed, and here shows that there is great significance to the study of enriching the mental image of integrated children mentally handicapped who are able to learn through the extent of Influence of the virtual museum on them.

As this is the training side will contribute to deepening the visual and mental vision and enrich the cultural aspect with mentally handicapped children who are able to learn, and can reach a variety of experimental entrances of the training program integrated to enrich the mental image that contribute to enrich the cultural and educational section for children with mental disabilities who are able to learn through a virtual museum .

The discovery of the semantic enrichment and cultural mental image through virtual museums rankings mental skills and innovative with disabled children by watching the virtual museums.

So it dyes researcher problem as follows: -

How to benefit from the virtual museum to enrich the mental image of mentally handicapped children who are able to learn.
