**Summary**

**Effective use of the programmed booklet in teaching "Women's blouse" Aldrich way to fourth year students of Home Economics Department**

The research consists of five chapters, as follows:

**Chapter One:**

Contains an introduction to the research, and the problem, objectives, and research hypotheses, and the importance of research, and the border, and the research methodology, terminology and related previous studies.

**Chapter Two**

Entitled learning and sense of self-definition, bases, characteristics, programmed instruction, types and preparation phases, bases, programmed instruction and criticism of it.

**Chapter Three**

Entitled blouse concept, definition, history, material, and their components. Fabrics Aldrich Pattern, and the component parts of blouse.

**Chapter Four**

Entitled the pilot study and included the study's methodology, and tools used in the study, and the application on the research sample, and Model Selection, and scheduled timeline for implementation, and preparation of raw materials required for the implementation of the experiment.

**Chapter Five**

Contains search results and statistically analyzed and discussed and recommendations and extract the most important results of the search.

**Abstract**

**Effective use of the programmed booklet in teaching "Women's blouse" Aldrich way to fourth year students of Home Economics Department**

The research dealt with the preparation of programmed booklet depends on the implementation of women's blouse in Aldrich Pattern way for the fourth year students, Home Economics Department, Faculty of Specific Education - Fayoum University. The researcher explained in detail the

concept of self-learning methods including programmed instruction "booklet programmed" method where several frames include Aldrich Pattern, blouse and definition, the method of implementation. Students implemented the suggested blouse through the curricula of the university.

**Keywords:** Self-learning, programmed booklet, and Aldrich\_Pattern.
