Acknowledgment

First and foremost of all thanks to Allah the most beneficial and merciful.

I am greatly honoured to express my sincere appreciation and deepest gratitude to my professor Dr. Nabila Yousef Abdel Halim, professor of Anatomy and Embryology, Cairo University for her instructive supervision, sincere encouragement and valuable advises. I am very much privileged and honoured to have her as my supervisor.

I wish to express my supreme thanks to Professor Dr. Safwat Wadie Gerges, professor of Anatomy and Embryology, Cairo University for his help, valuable guidance and keen supervision. To him I owe much than I can express.

My deepest gratitude and thanks for Professor Dr. Suhair Asaad Phillips, professor of Histology, Cairo University for her generous help and encouragement in image analysis and reading most of the histological data.

I would like to express my deepest appreciation to Dr. Maha Khalid Abd-Elwahed, lecturer of Anatomy, Fayoum University for her keen supervision, continuous support and precious guidance. I am deeply affected for her noble.
