**Title of Thesis: “STUDY ON FOOD SAFETY MANAGEMENT IN FOOD AND BEVERAGE OUTLETS IN CAIRO AND GIZA UNIVERSITIES “**  
**Department: Hotel Studies Department**

## **ABSTRACT**

No doubt that, Food Safety has become a theme which all people are interested in. In the latest years offering safe food has become the obsession that irritates people in both developed and developing countries. (WHO) recorded that millions of people in developed and developing countries infected with food borne diseases. So, The Present study focuses on evaluating the extent of food safety standards implementation and health practices in universities' food and Beverage outlets field of the study.

**The study results** emphasized that 63% of respondents have no adequate knowledge about safe food concept, The majority of food and Beverage outlets did not have personal hygiene training program to improve and increase health habits of food handlers and finally The results emphasized that there is not specialist department monitoring sanitary practices across these outlets to ensure safety of served food.

**Based on the results obtained, recommendations** were provided to help in existing a policy at universities high council to address safety of served food in food and beverage outlets, Providing higher levels of hygiene training to enable food and Beverage persons in charge to assesses accurately the risk offered by their business and determine appropriate hygiene training for their staff and establishing a separate sanitation department responsible for monitoring sanitary practices a cross these establishments.

**Key words:** Food Safety, Personal Hygiene, Waste Disposal, Cleaning and Sanitizing, Pest Control, Sanitary Design & Construction of Building and Equipment.
